

ABSTRACT OF THE DISCLOSURE

**APPARATUS AND METHOD OF VISITING BOOKMARKED WEB PAGES
WITHOUT OPENING A BOOKMARK FOLDER**

5

10 A method, system and apparatus for accessing bookmarked
Web pages without opening a bookmark folder are provided.
This is made possible by providing a next and a previous
icon in the browser to access the bookmarked Web pages.
When a Web page is being bookmarked, it can be chosen to be
part of a route (i.e., a string of bookmarks to be
successively accessed) or not. If it is part of a route,
the bookmarked Web page may be accessed without opening the
15 bookmark folder by using either the next or the previous
icon.
